

The Sunrun Difference

SUNRUN

Life runs on clean energy.

sunrun.com

"Sunrun's the largest residential solar company in the U.S. I mean, you need reliability when you're putting a system in. I want somebody who's here to protect me now and 15 or 20 years down the road."

Drew Scott

Co-host of Property Brothers
& Sunrun Customer

Staying power.

Experience When and Where You Need It.

While other companies are experimenting with the idea of full-service subscription models we've perfected them since 2007. From right-sizing your design to covering repairs if you ever need them -- we have the experience and track record to be there for the long haul.

You're Covered.

A lot can happen in 25 years. We get it. With our industry experience, we've got all your life events covered. Every year we remove and reinstall over 20,000 systems because homeowners want a new roof. We also easily transfer systems to new buyers to start them on their own solar energy journeys.

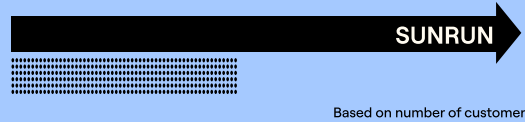

Committed to Energy Independence

Since 2007, our solar energy systems have generated 32.4 billion kilowatt hours of solar energy. That's the equivalent greenhouse gas emissions of taking 48 natural gas-fired power plants offline for a year.

The largest residential solar provider in the U.S.

2X
Larger

than the next
biggest home
solar company

Bigger than Sunnova & Tesla Energy combined
