

# Snow Guards

## WHY SNOW GUARDS?

Snow guards protect people, vehicles, landscaping, and other property below from potential injury or damage by holding snow in place on a roof until it can melt gradually and safely.

## SNOW GUARDS FOR SHINGLE ROOFS

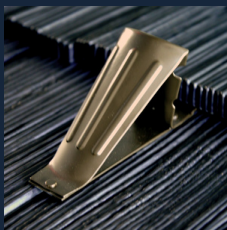

### HALF-ROUND PAD-STYLE

- Pad-style designs will allow snow to shed off the roof in small, managed amounts.
- Feature a folded and riveted design for optimum strength.
- Available Materials include Kynar coated Aluminum, Copper, FreedomGray™, Lead Coated Copper.

### FUSION-GUARD

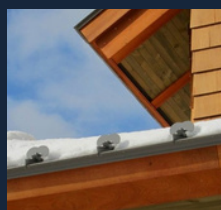

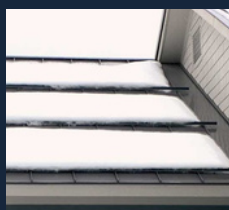

- High strength load value and tall profile - perfect for thick synthetic shingles.
- Multiple material options.
- Rods can be added to snow guard rows at the eave to create an additional barrier.

## SNOW GUARDS FOR METAL ROOFS

### PAD-STYLE

- Pad-style designs will allow snow to shed off the roof in small, managed amounts.
- Attachment options for both Corrugated and Standing Seam metal roofs.

### SNOWMAX - BAR-STYLE

- Bar-style snow retention will act as a barricade.
- Strongest snow management system on the market.
- Attachment options for both Corrugated and Standing Seam metal roofs.
